

## DEFINITIONS

### ~~-FEE TYPES-~~

#### **Household Collection Fee**

For one family unit, for one calendar year, this fee provides for: one set of carts, consisting of a waste cart, compost cart and mini bin, replacement and or repair of waste and compost carts, monthly collection of recyclable material, bi-weekly collection of waste and compost carts on alternating weeks, a Spring and a Fall cleanup collection and a Christmas tree collection. This fee also allows for the free drop off at any WWDC of recyclable & metal material (excluding metals from construction and demolition e.g. bath tubs, sinks, etc.) on Saturday mornings, household hazardous waste, white goods and residential bulk material any time during operating hours;

#### **Cottage Collection Fee**

For one cottage unit, for the period June 1 - Sept 30, this fee provides for: one set of carts, consisting of a waste cart, compost cart and mini bin, replacement and or repair of waste and compost carts, monthly collection of recyclable & metal material and bi-weekly collection of waste and compost carts on alternating weeks. This fee also allows for the free drop off at any WWDC of recyclable material on Saturday mornings, household hazardous waste, white goods and residential bulk material any time during operating hours;

#### **Extended Cottage Collection Fee**

Provide the same as above for the period May 15 - October 31.

### ~~-MATERIAL TYPE LISTING-~~

#### **Residential Waste**

Waste generated from Residential Sector; This material is capped at \$20 a load; and does not include metal or C&D. Only Regular Household Waste;

#### **Commercial Waste**

Waste generated from Commercial Sector; Any loads charged to a commercial account will be considered commercial waste unless the hauler is carrying material from a resident and has a disposal permit;

#### **Residential Compost**

Compost generated from Residential Sector; This material is capped at \$20 a load;

#### **Commercial Compost**

Compost generated from Commercial Sector; Any loads charged to a commercial account will be considered commercial compost unless the hauler is carrying material from a resident and has a disposal permit;

#### **Construction Demolition Debris**

Waste generated from the construction, demolition or renovation of a structure;

#### **Yard Trimmings - Residential**

Leaves, branches, grass clippings, generated from Residential Sector; This material is capped at \$20 a load;

#### **Yard Trimmings - Commercial**

Leaves, branches, grass clippings generated from Commercial Sector; Any loads charged to a commercial account will be considered commercial yard trimmings unless the hauler is carrying material from a resident and has a disposal permit;

#### **Contaminated Soil - Commercial**

Hydrocarbon contaminated soil from a Commercial Establishment. Must have a permit (Dept of Environment, Water & Climate Change) for disposal if greater than a ½ tonne truck load. A business card is required from an Environment Officer for ½ tonne or less loads so the scale house operator knows the spill has been reported to Environment. Loads ½ tonne or less are accepted at the WWDCs. Larger than ½ tonne go to EPWMF

#### **Contaminated Soil - Residential**

Hydrocarbon contaminated soil from a Residential Dwelling. Must have a permit (Dept of Environment, Water & Climate Change) for disposal if greater than a ½ tonne truck load. ; A business card is required from an Environment Officer for ½ tonne or less loads so the scale house operator knows the spill has been reported to Environment. Loads ½ tonne or less are accepted at the WWDCs. Larger than ½ tonne go to EPWMF

#### **Contaminated Material**

Commercial Bio-Medical Waste, Sharps, petroleum contaminated absorbents, ammonium nitrate materials, creosote materials etc. All commercial bio-medical & sharps must have a permit (Dept of Environment, Water & Climate Change) for disposal. Loads of Creosote, ammonium nitrate and petroleum contaminated absorbent material only require a permit if greater than ½ tonne truck;

#### **Confidential Material**

Material which has to be destroyed/disposed of while the customer is on site. Confidential Paper is no longer burned, customers are to be informed that is to be shredded and recycled. Only if the customer provides documentation requiring them by law to destroy by burning will they be issued permission to burn paper or other confidential material;

#### **Household Hazardous Waste**

Household cleaning chemicals, propane tanks/cylinders (100lbs and less), car batteries, paint, etc - **RESIDENTIAL SOURCE ONLY**. Commercial paint is accepted if it is acceptable by Product Care.

#### **Sludge**

Bio-solids from a waste water treatment facility;

#### **Mixed Waste**

Material which does not meet IWMC Sorting Guidelines; commercial and/or residential hauler refusing to sort material. Contamination must be 10% or more of the entire load for commercial and 5% or more of the entire load for residential;

#### **Silage Wrap - Recyclable**

Farm silage wrap clean enough to recycle;

#### **Silage Wrap - Waste**

Farm silage wrap not clean enough to recycle;

**Recyclable Residuals - Waste**

Recyclable Haulers Only; Residuals from the blue bag stream too dirty or unacceptable to recycle, ie. dirty bottles, plastics, cans or non recyclable plastics;

**Recyclable Residuals - Compost**

Recyclable Haulers Only; Residuals from the blue bag stream too dirty, wet or unacceptable to recycle, ie. wet paper, wet cardboard, boxboard, waxed cardboard, wrapping paper, etc;

**Appliances - White Goods**

Fridges, stoves, washers, dryers, deep freezers, dishwashers, hot water tanks, dehumidifier, air conditioners and heat pumps. No charge to the customer;

**Landlord Permits**

Landlords disposing of vacated tenant materials from inside the unit. Must be placed in the appropriate compost, waste, recyclable & mixed waste facility containers and/or location. A Special Disposal Permit is to be issued and a copy of the transaction ticket attached to the permit. See the Special Disposal Permit for guidelines . **NOTE: C&D material is not covered by a landlord permit;**

**Tires - Inbound**

This category is only to be used at EPWMF for tires from tire bins located throughout the Island and any WWDC. Process as Vehicle 98, MS Tire Recovery account;

**Metals**

All metals other than Appliances/white goods. Metals are accepted at all WWDC's and are charged according to tonnage. Residential Metal is free on Saturday mornings, if it meets curbside collection guidelines;

**Blended Rate**

Rate used when customers do not want to have each material type weighed separately at the WWDC's. Please inform customers of difference in costs. Material still has to be sorted;

**Asbestos**

Asbestos contaminated material must be taken to WL. Amounts larger than a few small pieces must have a permit (Dept of Environment, Water & Climate Change) for disposal;

**Bio-medical - Residential**

Bio-Medical Waste from Residential Sector only; these can be put to the cash account, there is no charge but records must be maintained at the scale house;

**Recyclables**

Recyclable Blue bags and recyclable material (paper, corrugated cardboard, container glass, plastics, cans). Residential Recyclables are free on Saturdays only (not commercial);

**Oil Tank**

Oil tanks can only be received if the customer has proof the tank has been purged. . A weight is not entered for this material type; it is measured by EACH tank. Simply place a 1 in the In box next to the material type;

**Illicit Material**

Litter and illicitly dumped garbage. This material type is only to be used if approval has been given by the Disposal Manager or designate. It must be identified as such by the hauler before crossing the scales; this material does not have to be sorted;

**International Waste**

International Waste material generated on ships and planes which must be burned. Must have a permit (Dept of Environment, Water & Climate Change) for disposal;

**Pollution Grit**

Used at Charlottetown WWDC only. This is used when receiving the grit material from the Charlottetown water & sewage plant;

**45 Gallon Drum**

Empty metal 45 gallon drums received at WWDCs. Like oil tanks, a weight is not entered for this material type; it is measured by EACH drum. Simply place the number of drums received in the In box next to the material type;

**Pharmaceuticals**

Residential Pharmaceuticals are not accepted (bring to a pharmacy). Commercial Sector should contact a hazardous waste carrier to dispose of Commercial Pharmaceuticals;

**INTL Waste DND**

International Waste material generated by Department of National Defense (DND) which must be burned. Accepted at EFW only.

**Oil Saturated Waste**

Material such as rags and absorbents soaked in oil. Permit is required from Dept of Environment, Water & Climate Change. This is used only at EFW

**Bricks/Concrete/Asphalt**

Bricks, concrete and asphalt pieces

**Residential Bulk Material**

Used at the WWDCs only. This includes bulk material from **households**, not within the residential curbside collection guidelines (over 50 lbs, larger than 4 feet in length, width or depth) i.e. mattresses, box springs, large furniture and carpet. This will be processed as a cash transaction with no charge; Mattresses and box springs for recycling do not need to be weighed.

**Asphalt Shingles**

Loads containing only asphalt shingles, if the asphalt shingles are mixed with other C&D material it cannot be processed as Asphalt Shingles must be C & D. Educate customer on benefits of keeping shingles separate;

**Mini Bins**

Customers can purchase mini-bins at all WWDC's. The charge is \$7 per mini-bin and is processed as an Each, put the number of purchased bins in the outbound weight field;

**Public Scale**

Public requesting a transaction for the weight only of their load. Fee is for per weigh.

**Fryer/Cooking Oil**

Cooking oil from residents and IC&I sector.

**Non-Compliance Bags**

Charge to customer (residential or IC&I) for **EACH** non-compliance bag contained within the load (e.g. blue, black, white, clear, other non-transparent bags, non-certified, by BPI or BNQ, compostable bags, biodegradable bags, etc..

**ADI Paper**

Paper taken from the Central Compost Facility to PEI Energy Systems for Incineration.

**OOP Contaminated Material**

Commercial Bio-Medical Waste, Sharps, petroleum contaminated absorbents, ammonium nitrate materials, creosote materials etc from out-of- province going into PEI Energy Systems for incineration. A permit from the Dept of Environment, Water & Climate Change is required.

**OOP Confidential Material**

Material from out-of-province going into PEI Energy Systems which has to be destroyed/disposed of while the customer is on site. Approval to receive this material must be given by the Disposal Manager.

**OOP Oil Saturated Waste**

Material such as rags and absorbents soaked in oil from out-of-province. Permit is required from Dept of Environment, Water & Climate Change. This is used only at PEI Energy Systems.

**OOP Contaminated Soil**

Contaminated soil received from out-of-province
